1H22: \$4.75bn cash NPAT, 175¢ interim dividend

CBA's result includes: 1) cash NPAT (continuing operations) \$4.75bn (BP \$4.38bn); 2) cash EPS (continuing operations) 273ϕ (BP 247ϕ); 3) interim dividend 175ϕ (BP 162ϕ) fully franked (payout ratio 62%); 4) ROE (continuing operations) 12.3% (BP 11.4%); 5) NIM (continuing operations) 1.92% (BP 1.93%); 6) loan impairment expense -\$0.07bn/-2bp GLA (BP \$0.32bn/8bp); and 7) CET1 ratio 11.8% (BP 11.4%).

We will focus purely on cash NPAT from continuing operations. CBA's \$4.75bn cash NPAT was 8% higher than our forecast and was mainly due to a benefit in loan impairment. Regardless, this was another strong outcome despite low interest rates and purely as a result of COVID-19. Other than a loan impairment benefit of \$0.07bn/2bp GLA, this was also due to continued volume growth in home lending, business lending and deposits (above system growth in all core markets), disciplined and flat operating costs, reduction in remediation costs and, above all, a still improving economic outlook. Cash NPAT was nearly on par with 2H21, a great outcome. There was also investment in operational execution (in line with the bank's strategic priorities) coupled with a return of excess capital to shareholders of \$2bn (on-market share buyback; surplus capital post buy-back would be around \$4bn). Finally, the interim dividend was set at 175¢ being fully franked (no DRP, neutralised).

\$108.00 price target unchanged, back to a Buy

While cash earnings in FY22e and FY23e are increased substantially by 11% and 8%, these were mainly due to lower credit impairment expenses [FY22e \$101m (previously \$728m) and FY23e \$761m (previously \$1,113m)]. There were also benefits from higher total operating income every year (4-5%) mainly from volume-related lending and deposit fees. Given that, cash earnings were increased by 2% from FY25e onwards. Net of higher risk metrics (sustainable dividend yield up by 25bp to 3.75% and discount rate up by the same amount to 9.75%), the amount is only break-even – meaning the valuation and price target are unchanged from \$108.00. Allowing for the current interim dividend of 175¢, the rating for CBA is brought back to a Buy.

1H22: \$4.75bn cash NPAT, 175¢ interim dividend

CBA's result is as follows:

- 1. Statutory NPAT \$5.87bn (BP \$4.68bn);
- 2. Cash NPAT (including discontinued operations and one-offs) \$4.85bn (BP \$4.38bn);
- 3. Cash EPS (including discontinued operations and one-offs) 279¢ (BP 247¢);
- 4. Cash NPAT (continuing operations) \$4.75bn (BP \$4.38bn);
- Cash EPS (continuing operations) 273¢ (BP 247¢);
- 6. Interim dividend 175¢ (BP 162¢) fully franked (payout ratio 62%);
- 7. ROE (continuing operations) 12.3% (BP 11.4%);
- 8. NIM (continuing operations) 1.92% (BP 1.93%);
- 9. Loan impairment expense (LIE) -\$0.07bn/-2bp GLA (BP \$0.32bn/8bp); and
- 10. CET1 ratio 11.8% (BP 11.4%).

We will focus purely on cash NPAT from continuing operations. CBA's \$4.75bn cash NPAT was 8% higher than our forecast and was mainly due to a benefit in loan impairment. Regardless, this was another strong outcome despite low interest rates and purely as a result of COVID-19. Other than a loan impairment benefit of \$0.07bn/2bp GLA, this was also due to continued volume growth in home lending, business lending and deposits (above system growth in all core markets), disciplined and flat operating costs, reduction in remediation costs and, above all, a still improving economic outlook.

The following table implies cash NPAT was nearly on par with 2H21, a great outcome. There was also investment in operational execution (in line with the bank's strategic priorities) coupled with a return of excess capital to shareholders of \$2bn (on-market share buyback; surplus capital post buy-back would be around \$4bn). Finally, the interim dividend was set at 175¢ being fully franked (no DRP, neutralised).

Profit & loss highlights

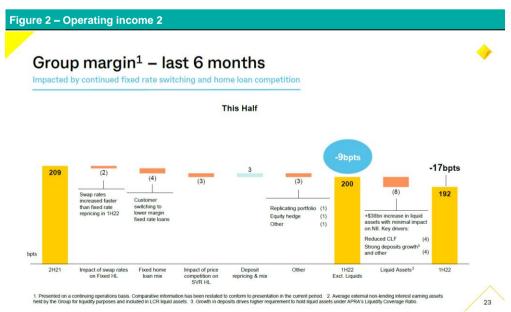

TOTAL OPERATING INCOME

Total operating income was up by 2% to \$12.21bn, driven by core volume growth (home lending, business lending and deposits) and higher fee income offset by lower NIM. While NII increased by 1.5%, there was a fall in NIM by 14bp to 1.92% (although the fall was much smaller at 5bp based on excluded lower yielding liquid assets and basically driven by more fixed rate home loans, rising swap rates and ongoing pressure in the home loan market space).

Home loan price competition and switching may continue in the second half but non-interest income was up by 4.1% (and mainly driven by higher volume related lending and deposit fee income).

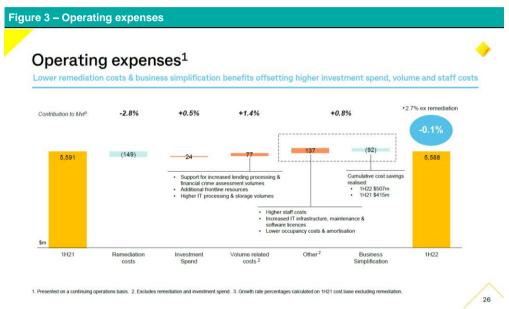

SOURCE: COMPANY DATA

SOURCE: COMPANY DATA

OPERATING EXPENSES

Operating expenses remained a key positive at \$5.58bn, being flat, and were driven by lower occupancy, IT and remediation costs that just offset higher staff expenses (necessary to support volumes and strategic initiatives). Staff expenses increased by 13% due to higher staff numbers (increased loan application processing, higher financial crime assessment volumes and cyber security capabilities) and wage inflation. Occupancy and equipment expenses were down by 16% due to branch/ATM optimisations and exit of commercial office space, while IT expenses fell by 5% as a result of lower amortisation and business simplification initiatives net of higher infrastructure and maintenance costs. Finally, remediation costs were now lower driven by lower Aligned Advice costs.

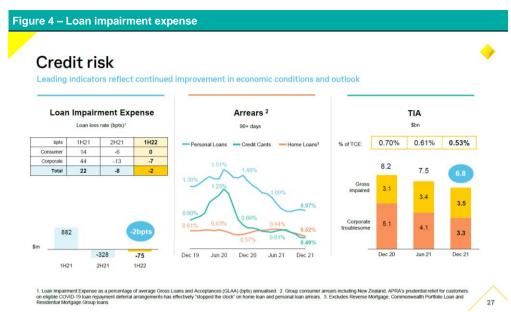

SOURCE: COMPANY DATA

LOAN IMPAIRMENT EXPENSE

Loan impairment expense decreased by \$957m to a benefit of \$75m basically due to an improved COVID-19 economic outlook. This was not anticipated but certainly fills in the gap for the time being, and we have lowered the costs over the next few years. Regardless, provisions were still higher than expected losses under the central economic scenario. Arrears on home loans and consumer finance remained low, likewise credit card and personal loans. As such, troublesome and impaired assets further decreased by almost 10% to \$6.8bn while Corporate troublesome assets further decreased by \$0.8bn on the previous half (refinancing, repayments and upgrades).

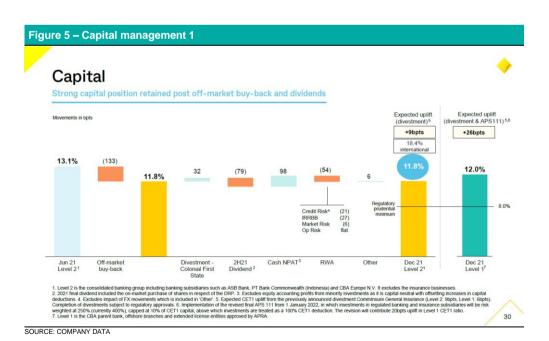

Overall loan impairment provisions decreased from \$6.82bn to \$5.85bn as such. On the other hand, there was a small increase in gross impaired assets (+\$73m) due to New Zealand restructured home loans and a small number of single corporate name exposures.

SOURCE: COMPANY DATA

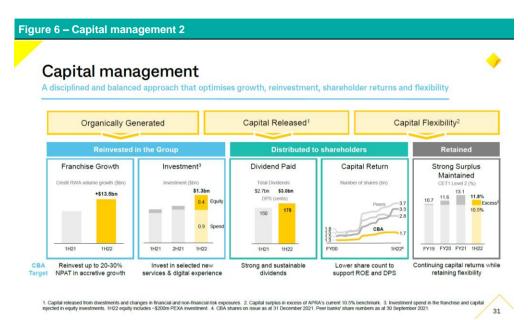

OTHER ITEMS

The quality of the bank's funding, liquidity and capital measures continue to be strong. The loan book is still 73% deposit funded (and almost unchanged at 74% at the end of FY20), while LCR was 134%, NSFR was 131% and Level 2 CET1 ratio was 11.8%. CBA completed the \$6bn off-market share buy-back (-133bp) plus the 2H21 final dividend payment (-79bp) and higher RWA (-54bp), funded by strong profit generation (+98bp) and asset sales (+32bp). The interim dividend was 175¢ and payout ratio was 62% (or ~70% normalised for long run loss rates). The bank will still target a full year cash payout ratio of 70-80% and an interim ratio of ~70%.

Despite the misgivings of the market and especially COVID-19's Omicron strain, CBA sees FY22 as a strong year. The unemployment (and underemployment rate) are the lowest since 2008 and Australian household accumulated savings are stronger than ever (likewise the rate at which wage growth in anticipated). Inflation is likely to increase in due course (and that's a good thing for all banks) while non-mining investment including infrastructure

continue to hold up reasonably well. The bank has again bounced back from its lows and is on its way back to its usual top line growth potential.

\$108.00 price target unchanged, back to a Buy

While cash earnings in FY22e and FY23e are increased substantially by 11% and 8%, these were mainly due to lower credit impairment expenses [FY22e \$101m (previously \$728m) and FY23e \$761m (previously \$1,113m)]. There were also benefits from higher total operating income every year (4-5%) mainly from volume-related lending and deposit fees. Given that, cash earnings were increased by 2% from FY25e onwards. Net of higher risk metrics (sustainable dividend yield up by 25bp to 3.75% and discount rate up by the same amount to 9.75%), the amount is only break-even – meaning the valuation and price

target are unchanged from \$108.00. Allowing for the interim dividend of 175ϕ , the rating for CBA is brought back to a Buy.

Commonwealth Bank

Company description

CBA is Australia's leading integrated financial services organisation, providing banking and wealth management (funds management, superannuation, insurance and investment advice) products and services to over 10m customers. It currently occupies pole positions in home lending and retail deposits. The bank's strategic strengths of scale, brand and diversified mix is supported by an irreplaceable infrastructure consisting of over 1,100 branches, 3,800 Australia Post agencies and nearly 3,600 ATMs.

Investment strategy

CBA's strategy is built upon continuous service and sales improvement backed by IT and operational excellence, and a leadership position in retail banking. Incremental value add is expected to come from opportunities in the SME banking, ECM / DCM and wealth management space (particularly in advice, private banking and life risk where the market is 80% underinsured) and selective Asian expansion (East Asia and Singapore).

Valuation

The price target is based on a composite valuation of DCF, dividend yield, ROE and Sumof-Parts weighted equally.

Table 6 - SOP valuation

Table 5 – Composite valua	Value (\$m)	Per share	Weighting	Composite value per share
DCF	148,739	\$87.17	25%	\$21.79

SWOT analysis

Strengths

- 1. Retail and business banking (sales and service);
- Strong management and execution capabilities;
- 3. Cost discipline;
- 4. Lower risk banking assets; and
- 5. IT capabilities.

Weaknesses

- 1. WA market although recovering slowly; and
- 2. Ongoing liquidity drag in a low rate environment that is a systemic issue.

Opportunities

- 1. Value add from ECM / DCM opportunities in capitalising on the bank's AA- rating and balance sheet strength;
- 2. Selected capital-light offshore e-banking opportunities; and
- 3. Leveraged to the strength of NSW and VIC economies.

Threats

- 1. Macroeconomic factors such as higher unemployment and slowing credit growth;
- 2. COVID-19 fallout;
- 3. Changes in regulatory environment;
- 4. Disruptors;
- 5. Negative fallout from offshore regulator civil actions and domestic class actions;
- 6. Bank re-regulation; and
- 7. Some sovereign risk.

SOURCE: BELL POTTER SECURITIES ESTIMATES

Recommendation structure

Buy: Expect >15% total return on a 12 month view. For stocks regarded as 'Speculative' a return of >30% is expected.

Hold: Expect total return between -5% and 15% on a 12 month view

Sell: Expect <-5% total return on a 12 month view

Speculative Investments are either start-up enterprises with nil or only prospective operations or recently commenced operations with only forecast cash flows, or companies that have commenced operations or have been in operation for some time but have only forecast cash flows and/or a stressed balance sheet.

Such investments may carry an exceptionally high level of capital risk and volatility of returns.
